DISCLAIMER

This is an informative & educative presentation. The sole purpose of this presentation is to provide information and updates on available & prevalent opportunities. That Under no circumstances should this presentation be considered as any type of solicitation, investment or financial advice. Your Participation in this project, like any other, involves risk. The information is provided to you in general terms, without taking notice of your specific personal and financial situation.

The Project is on a best effort basis and, like any project, there is a risk of loss of all funds and commissions. Past results are not a guarantee of future performance.

We recommend you seek the advice of a suitably qualified professional before deciding if unsure. Your continued attendance of this meeting beyond this point, indicates your acceptance of the above terms.

WHAT IS CRYPTOCURRENCY

A cryptocurrency is a digital or virtual currency that is secured by cryptography, which makes it nearly impossible to counterfeit or double-spend. Many cryptocurrencies are decentralized networks based on blockchain technology—a distributed ledger enforced by a disparate network of computers.

A defining feature of cryptocurrencies is that they are generally not issued by any central authority, rendering them theoretically immune to government interference or manipulation.

KEY TAKEAWAYS

A cryptocurrency is a form of digital asset based on a network that is distributed across a large number of computers. This decentralized structure allows them to exist outside the control of governments and central authorities.

Some experts believe that blockchain and related technology will disrupt many industries, including finance and law.

The advantages of cryptocurrencies include cheaper and faster money transfers and decentralized systems that do not collapse at a single point of failure.

The disadvantages of cryptocurrencies include their price volatility, high energy consumption for mining activities, and use in criminal activities.

WHAT IS BLOCKCHAIN

A blockchain is a distributed database or ledger that is shared among the nodes of a computer network. As a database, a blockchain stores information electronically in digital format. Blockchains are best known for their crucial role in cryptocurrency systems, such as Bitcoin, for maintaining a secure and decentralized record of transactions. The innovation with a blockchain is that it guarantees the fidelity and security of a record of data and generates trust without the need for a trusted third party.

Benefits blockchain can bring to business

1. Trust

Enables trust between participants who don't know each other.

2. Decentralized structure

Enables real-time data sharing among businesses like suppliers and distributors while reducing points of weakness.

3. Improved security and privacy

Creates an unalterable record of transactions with end-to-end encryption, which reduces fraud and unauthorized activity.

4. Reduced costs

Creates efficiencies by reducing manual tasks such as aggregating and amending data and by easing reporting and auditing.

5. Speed

Eliminates intermediaries so transactions are handled faster than conventional methods.

6. Visibility and traceability

Tracks the origins of a variety of items, such as medicines, to confirm they're legitimate instead of counterfeit and organic items to confirm they're indeed organic.

7. Immutability

Ensures transactions can't be changed or deleted.

8. Individual control of data

Gives entities the ability to decide what digital data they want to share, with whom and for how long, with limits enforced by smart contracts.

9. Tokenization

Converts value of an asset into a digital token recorded and shared via blockchain. Non-fungible tokens are used to sell digital art.

10. Innovation

Leaders across multiple industries are exploring and implementing blockchain-based systems to solve intractable problems and improve long-standing cumbersome practices, such as verifying the info on a job resume.

BITCOIN (BTC)

Bitcoin made revolution in Cryptocurrency Industry in 2008, ever since then holding a biggest volume in the world. It works on PoW with TPS of 3

Total Supply: 2,10,00,000

CRYPTOCUR ETHEREUM(ETH)

This is the 2nd biggest cryptocurrency in the world after Bitcoin. It works on PoW with TPS of 25

Total Supply: 11,85,27,124

BINANCE SMART CHAIN(BSC)

Binance Smart Chain, shortly termed as BSC is a new blockchain that runs parallel with the Binance Chain which is enabled by smart contract built to be Ethereum Virtual Machine (EVM). BSC is built to provide the ability to develop and deploy DApps on Ethereum which is on Binance's New blockchain.

BSC boosts the functionality and the compatibility with Ethereum Virtual Machine. The BSC was launched with the goal to provide support to the Ethereum tools and DApps. BSC supports for cross-chain transfers, creation of pegged coins. These pegged coins on BSC. BEP 20 act similar to ERC 20 tokens.

TPS As per Coin

RICAVAERSE COIN

Ricavaerse is developed on **BEP20** Blockchain which is Binance latest blockchain with highest **TPS of 2000** & limited supply of **5,25,00,000 RVC**

STAKING

STAKING PROGRAMME

EXAMPLE: STAKING AMOUNT \$1000 FOR 36 MONTHS

Ricaverse Coin Price: \$0.05 Cent (Staked Coin : 20000 RVC)

You can Earn Monthly Staking Income 8% of \$1000 for 36 Months (280%)

After 36 Months Your Staked Coin will Release to your wallet

If Coin price will \$10 After 36 Months

The VALUE OF 20000RVC WILL \$2,00,000

EXAMPLE: STAKING AMOUNT \$1000 FOR 18 MONTHS

Ricaverse Coin Price: \$0.05 Cent

(Staked Coin : 20000 RVC)

You can Earn Monthly Staking Income 6%

of \$1000 for 18 Months (102%)

After 18 Months Your Staked Coin will

Release to your wallet

If Coin price will \$5 After 18 Months

The VALUE OF 20000RVC WILL \$1,00,000
